Walk-in Bathtub

Hydrotherapy Jet Massage

A total of 10 water jets massage the body, eliminating pain-causing lactic acid in the muscles, while helping to relieve body aches and inflammation.

Air Bubble Therapy

18 air spa jets release thousands of tiny bubbles creating a gentle, caressing massage, improving circulation. Warm air bubbles increase buoyancy, making tired muscles weightless and relieving tired joints.

Color Chromatherapy

The use of colored lights in water improves one's mood and enhances relaxation. Chromatherapy is used for stress, insomnia and seasonal affective disorder.

Aromatherapy

A selection of scents are available which release neurochemicals in the brain that result in relaxation or invigoration, depending upon the essential oil chosen.

Ozone Therapy & Purification

Ozone purifies the water and aids in healing skin conditions. Ozone enhances oxygen intake as well. This low density ozone has an oxidizing effect that actually disinfects the water.
